John Yanarella

360|Flex

San Jose

WHAT IS SWIZ?

Brutally simple
micro-architecture
for RIA development
with Adobe Flex or
pure AS3.

WHAT DOES SWIZ DO?

Provides simple mechanisms for implementing IoC and DI, primarily through custom metadata.

WHAT IS IOC/DI?

- Inversion of Control
  - Hollywood Principle

- Dependency Injection

WHY IOC/DI?

- Separate configuration from execution
- Promotes encapsulation
- Promotes simpler, focused components

WHAT (ELSE) DOES SWIZ DO?

- Encourages good architecture
- Simplifies remote method usage
- Simplifies & decouples event handling
- Provides utilities for service mocking

WHAT DOES SWIZ BELIEVE IN?

- Simplicity
- Flexibility
- No boilerplate
- Portability
- Staying out of your way
